

Press Release – For Immediate Release

Solutions Atlantic RRS Integrates With Eagle Investment Systems

Boston, MA, March 25, 2002 - **Solutions Atlantic** today announced plans to integrate its **Regulatory Reporting System (RRS)** with the **Eagle PACE** data hub, data warehouse and portfolio management system from Eagle Investment Systems.

RRS is a flexible, rules-based system for investment managers. It aggregates securities holdings across business units, tests them against regulatory requirements, automatically generates the required filing documents and manages the associated workflow for the document review and submission process. RRS enhances the entire regulatory process because it improves the quality of the information included in regulatory filings, ensures that no required filings are missed and, most importantly, prevents unnecessary filings. It has been used to successfully submit thousands of filings to regulatory bodies.

“We are extremely excited about the opportunity to work with Eagle Investment Systems,” said Kevin Samborn, President of Solutions Atlantic. “RRS is perfectly suited to take advantage of the sophisticated data management and transmission capabilities provided by PACE. The addition of our regulatory reporting capabilities to the suite of applications built around PACE provides another valuable benefit for Eagle’s customers.”

Solutions Atlantic will demonstrate integration of the two products at the Eagle Investment Systems 2002 Users’ Conference, being held March 24-27 at the Ritz Carlton in Amelia Island, Florida.
