## 2021 RRS Annual User Group Meeting

*Happenings in the World of Major Shareholdings*

Boston – 12 Nov 2021

Users from around the globe “zoomed” in for Solutions Atlantic’s Eighth Annual Regulatory Reporting System User Group meeting. While these meetings have been traditionally in person, this year’s meeting was moved online due to the Covid-19 Omicron variant concerns; although that did not hinder a record number of participants tuning in to get a glimpse of enhancements coming online or a regulatory roundup of the happenings within the world of major shareholdings.

Regulatory and product experts from aosphere were on hand to provide a look at changes through 2021 and those expected to come in 2022. Consensus was that there will be a continued focus on foreign investment controls and short selling, particularly making permanent the 0.1% short selling threshold in the E.U. is expected in the early part of the year.

Clients came ready to discuss new enhancements for development consideration heading into 2022 which will continue to add value to user workflow and UI customizations, and new data sets. “The majority of our clients have complex organizations and investment strategies that require a robust approach to enhancing RRS so that they can meet those regulatory reporting obligations with confidence,” said Mitch Greess, CEO of Solutions Atlantic.

*Solutions Atlantic is a market leading provider of shareholding disclosure solutions to the global financial services industry. For over 20 years, its Regulatory Reporting System (RRS) has been at the forefront of global shareholding disclosure obligations and currently supports a client base having over \$10 trillion in assets under management. With regulatory rules for over 100 jurisdictions, RRS leads the way in complete workflow automation including: monitoring, alerting and generating disclosure documents. Solutions Atlantic is headquartered in Boston, MA.*
